This is to inform you that preliminary field work, consisting of grass/brush mowing will commence on the above referenced site this Thursday and Friday, July 12 and 13. No subsurface work (grubbing) will be completed at this time. This will allow for the completion of the preliminary survey work to mark-out the locations of the planned excavation areas next week. We will send a second notification at least 2 days prior to our expected date of full mobilization to complete the remediation. Please let us know if you have any questions. Thanks,

Richard G. Kowalski, CPG, LSP, CHMM  
Senior Hydrogeologist
